Backend Engineer | Python | FastAPI | SQLAlchemy | REST APIs | Docker | PostgreSQL

U.S. Work Authorized — No Sponsorship Required

Summary

FIU Computer Engineering graduate (**Cum Laude, GPA 3.64**) focused on **backend and systems engineering**. Built backend services with **Python, FastAPI, SQLAlchemy, JWT authentication, PostgreSQL**, and operated a production web platform with modular backend integrations, CI/CD deployment workflows, and hosting infrastructure.

Technical Skills

Languages: Python, Java, C, JavaScript, SQL, Bash, HTML, CSS

Backend & Data: FastAPI, Flask, REST APIs, SQLAlchemy ORM, Pydantic, JWT Authentication, OpenAPI, PostgreSQL, SQLite

Tools & Foundations: Docker, Docker Compose, Git, GitHub, GitHub Actions, Linux, cPanel, VS Code, Data Structures, Algorithms, Systems Programming, Operating Systems, API Design, Azure Fundamentals (AZ-900), Azure AI Fundamentals (AI-900)

Experience

VIZA Migrant-Pro Solutions USA

Sarasota/Bradenton, FL

IT & Web Systems Lead (Founding / Part-Time)

2021–Present

- Built and operate a production web platform for a client-facing immigration services business using **HTML/CSS/JavaScript**, with separate **Node.js** and **Python/Flask** backend service modules for dynamic content delivery.
- Designed and implemented a **GitHub Actions CI/CD workflow** that deploys website assets and backend services on push to **main** or manual dispatch, sequencing rollout across the static site, Node feed API, and Python news module via **FTP/FTPS**.
- Developed and maintained user-facing backend integrations including a server-side **YouTube feed API** and a **Flask-based USCIS RSS-to-JSON service**, with environment-based configuration, health endpoints, caching/fallback behavior, and deployment validation checks.
- Managed web operations across **cPanel hosting**, domain/DNS configuration, SSL lifecycle, updates, backups, and internal technical support for staff tools and documentation workflows.

Technical Projects

FinanceTrackerService — Backend API

2026

Python, FastAPI, SQLAlchemy, PostgreSQL, Docker

- Implemented user registration and authentication with **password hashing** and **JWT-based access control**, and exposed interactive API documentation through **OpenAPI**.
- Delivered a reproducible development workflow using environment variables, **Uvicorn**, and **Docker Compose** with a **PostgreSQL** database container.

ArtaLock Smart Access System — Team Lead & Software Developer (FIU Senior Design)

2025

Electron, JavaScript, TypeScript, REST APIs, Jetson Nano

- Built a cross-platform desktop application for a facial-recognition access control system, integrated with local services for authentication, permissions, and multi-user workflows.
- Led a **5-student engineering team** across two semesters through integration, testing, and final defense delivery.

Education

Florida International University

Miami, FL

Bachelor of Science in Computer Engineering

Dec 2025

Cum Laude | GPA: 3.64

Relevant Coursework: Data Structures, Systems Programming, Embedded Operating Systems, Big Data Analytics, Analytics & Cloud

Professional Development

Microsoft Certified: Azure Fundamentals (AZ-900), Azure AI Fundamentals (AI-900)

IBM Software Development Professional Certificate: Software engineering, Git/GitHub, Linux/Shell, Python, Flask, Django + SQL, Containers, Microservices, Application Security
