Summary

FIU Computer Engineering graduate (Cum Laude) focused on backend and cloud-based systems. Built containerized API services using FastAPI, SQLAlchemy ORM, OAuth2 authentication, and PostgreSQL, with experience deploying Dockerized microservices. Strong CS fundamentals (Data Structures, Operating Systems) experience managing live web infrastructure (DNS, SSL, CI/CD). Seeking Software Engineer/Developer or Backend Engineer/Developer roles (Remote or Hybrid in Tampa Bay or similar area). U.S. Work Authorized.

Education

Florida International University

Jun 2023 - Dec 2025

Bachelor of Science in Computer Engineering, Cum Laude (GPA: 3.64)

Miami, FL

- **Relevant Coursework:** Data Structures, Systems Programming, Embedded Operating Systems, Big Data Analytics, Cloud Computing

IBM Back-End Professional Certificate

Apr 2026

successful completion of IBM IBM Back-End Development Specialization.

- **Relevant Coursework:** Introduction to Software Engineering, Linux Commands and Shell Scripting, Django Application Development with SQL and Databases, Introduction to Containers w/ Docker, Kubernetes and OpenShift, Microservices and Serverless, Back-end Application Development Capstone Project

Experience

VIZA Migrant-Pro Solutions USA

2021 – Present

IT & Web Systems Lead (Part-Time)

Sarasota/Bradenton, FL

- Built and maintained a production web platform using **HTML/CSS/JavaScript** with server-side modules in **Python (Flask)** and **Node.js**.
- Implemented a **Node.js YouTube API integration** with server-side caching logic to reduce redundant API calls and improve response performance.
- Developed a **Flask-based RSS parsing service** and designed a **GitHub Actions CI/CD pipeline** to automate deployments, while managing **DNS configuration** and **SSL certificate lifecycle**.

Projects

Concert Media Microservices Platform (IBM Capstone) | Python, Django, Flask, MongoDB, MySQL, Docker, Kubernetes, OpenShift

- Developed a containerized multi-service application with a Django core platform and dedicated media microservices.
- Implemented a MongoDB-based songs service and relational user authentication workflows.
- Built Docker images and deployed services to Kubernetes clusters using OpenShift on IBM Cloud.

FinanceTrackerService API Platform | Python, FastAPI, PostgreSQL, OAuth2, JWT, Docker Compose

- Designed a containerized microservice-style architecture with separate **authentication** and **transaction services**, communicating through isolated service dependencies.
- Implemented secure **OAuth2 authentication** and **JWT-based session management**, storing credentials, refresh tokens, and session data in dedicated PostgreSQL databases.
- Configured a **Docker Compose environment** running three coordinated containers (auth service, transaction service, PostgreSQL) supporting independent service deployment and database isolation.

Technical Skills

Languages: Python, Java, C, JavaScript, SQL, Bash

Frameworks: Flask, FastAPI, Django

Databases: PostgreSQL, MongoDB, MySQL, SQLite

Tools: Docker, Docker Compose, Git, GitHub Actions

Platforms: Linux, IBM Cloud, OpenShift, Kubernetes
