Application Security for Developers and DevOps Professionals

Monitoring and Observability for Development and DevOps

Back-end Application Development Capstone Project

Apr 9, 2026

Kevin Quiceno Cardenas

has successfully completed the online Professional Certificate

IBM Back-End Development

In this Professional Certificate learners developed the key skills and know how required for Back-End Development. They used latest tools and technologies used by professional back-end developers, including Linux scripting, Git and GitHub, Python, SQL, Django, Containers, Docker, Kubernetes, and OpenShift, Microservices, Serverless, as well as practiced Application Security, and Monitoring. The holders of this certificate completed numerous hands-on labs and projects to gain practical experience. They should now be able to take on the challenges for an entry level role in Back-End Development to build server-side systems and services that power modern web and mobile applications.
