Graded Assignment • 1h

**Due** Apr 15, 11:59 PM UTC**Your grade: 60%**Your latest: **60%** • Your highest: **60%**

To pass you need at least 70%. We keep your highest score.

Retry

1. Your organization has experienced several issues with performance, outages and is starting to see some loss in revenue. You have been tasked with finding a solution to help identify and resolve issues quickly and minimize downtime. What type of solution should you look for?

1 / 1 point

- ☐ Incident prevention
- ☒ Application monitoring
- ☐ Alerting
- ☐ Dynamic analysis

Correct

Correct! Application monitoring helps you detect, prevent, and resolve problems more quickly. Receive alerts as problems arise and gain valuable insight into application performance from real-time metrics gathered. Reduce downtime to save money and maintain a positive user experience.

2. Your company is looking for a way to gain a deeper insight into their business systems to understand how they perform and how customers utilize their web apps. Vast amounts of data are collected from business systems, but how can they make sense of it?

1 / 1 point

- ☐ Performance indicators
- ☐ Application metrics
- ☐ System event logs
